CONMED DONATES \$100,000 TO ASGE'S IT & T CAPITAL CAMPAIGN TO BUILD A NEW STATE-OF-THE-ART GI TRAINING CENTER

OAK BROOK, Ill. – March 1, 2012 – The American Society for Gastrointestinal Endoscopy (ASGE) Foundation has received a donation of \$100,000 from CONMED Corporation (CONMED) to ASGE's IT & T Capital Campaign, a fundraising project to construct a new facility that will provide cutting-edge technology and training capabilities to significantly optimize current educational opportunities. The donation will be made over five years.

“We thank CONMED for their generous donation and look forward to a continued partnership with them as we look to the future and open this new state-of-the-art GI training facility,” said Gregory G. Ginsberg, MD, FASGE, president, American Society for Gastrointestinal Endoscopy. “Like ASGE, CONMED understands the importance of providing high quality physician education using the latest technologies, and this new center will foster the development, training and adoption of new techniques in order to improve physician performance and advance patient care.”

ASGE has been providing learning opportunities at its current Institute for Training & Technology (IT & T) in Oak Brook, Ill. The new facility will be situated on a 3.5-acre plot in Chicago's Downers Grove suburb, close to both O'Hare and Midway airports, and will serve as the global home of endoscopy, offering a full range of medical training and continuing medical education (CME).

“In today's dynamic healthcare environment, the partnership between industry and organizations, such as the ASGE, will be critical for the ability to deliver technological advancements and ultimately, improved patient care” said Mark R. Donovan, vice president, CONMED Endoscopic Technologies. “For over 20 years, CONMED has been a contributing member of the global GI community with a deep appreciation for training and education and as such, a longtime supporter of the ASGE. ASGE's decision to develop the Institute for Training & Technology is the natural extension of their efforts. CONMED believes that

the ASGE Institute for Training & Technology will have a tremendous impact on the future of endoscopy and is proud to be a Corporate Partner in its development.”

The new facility will offer:

- Significantly enhanced laboratory facilities that will house up to 16 endoscopy towers and other medical equipment to provide training simulations using the latest equipment and technologies
- Advanced training models and simulators
- A 100-seat auditorium with a built-in audience-response system
- In-house DVD authoring and rapid duplication capabilities
- Additional conference space and breakout rooms
- The capability to send and receive live satellite transmissions anywhere in the world, including endoscopic instruction and demonstration techniques as well as didactic lectures on research and educational findings
- The potential to access live and/or recorded institute hands-on and didactic courses via video streaming technology or the ASGE-controlled digital resource library
- The ability for domestic and international faculty to participate in courses on site or via satellite to teach cutting-edge techniques live to anyone, anywhere in the world
- A residence for international members to extend training while in the U.S. attending DDW® or other meetings, allowing them to learn and practice techniques that are not standard in their regions of the world

ASGE and the ASGE Foundation promote ongoing research in gastrointestinal endoscopy and its applications to disease management and prevention to ultimately improve the quality of endoscopy delivered to patients. The ASGE Foundation also funds programs designed to improve physician training and foster career development as well as supports important educational initiatives aimed at explaining the role of endoscopy in digestive health to the public. The IT & T Capital Campaign has raised funds from ASGE members and corporate partners, and the campaign is over 90 percent of its \$6 million fundraising goal.

About the American Society for Gastrointestinal Endoscopy

Since its founding in 1941, the American Society for Gastrointestinal Endoscopy (ASGE) has been dedicated to advancing patient care and digestive health by promoting excellence in gastrointestinal endoscopy. ASGE, with nearly 12,000 members worldwide, promotes the highest standards for endoscopic training and practice, fosters endoscopic research, recognizes distinguished contributions to endoscopy, and is the foremost resource for endoscopic education. Visit www.asge.org and www.screen4coloncancer.org for more information and to find a qualified doctor in your area.

About CONMED Corporation

CONMED is a medical technology company with an emphasis on surgical devices and equipment for minimally invasive procedures and patient monitoring. The Company's products serve the clinical areas of arthroscopy, powered surgical instruments, electrosurgery, cardiac monitoring disposables, endosurgery and endoscopic technologies. They are used by surgeons and physicians in a variety of specialties including orthopedics, general surgery, gynecology, neurosurgery and gastroenterology. Headquartered in Utica, New York, the Company's 3,400 employees distribute its products worldwide from several manufacturing locations.

About Endoscopy

Endoscopy is performed by specially-trained physicians called endoscopists using the most current technology to diagnose and treat diseases of the gastrointestinal tract. Using flexible, thin tubes called endoscopes, endoscopists are able to access the human digestive tract without incisions via natural orifices. Endoscopes are designed with high-intensity lighting and fitted with precision devices that allow viewing and treatment of the gastrointestinal system.
