Webinar: Endoluminal Approaches to Complex Colorectal Polypoid Lesions
Interface Between Endoscopic and Minimally Invasive Surgical Modalities

Thursday, October 15 | 7:00 PM (EDT)

Join us for a virtual discussion between gastroenterologists, endoscopists and surgeons about managing rectal neoplasia and achieving the most favorable clinical outcomes.

TOPICS

- Review advanced endoscopic and transanal surgical techniques for colorectal neoplasia management.
- Share perspectives on navigating treatment options for optimal clinical outcomes.
- Enhance communication and collaboration between gastroenterologists and surgeons.
