WHY YOU SHOULD ATTEND

In this era of the COVID-19 pandemic, expert faculty members will provide guidance on preparing for a similar pandemic in the future. Key discussions and topics will include:

- How to mitigate burnout; a growing problem for gastroenterologists.
- Updates in best practices in colonoscopy, highlighting the most recent recommendations for surveillance after colonoscopy and polypectomy and for endoscopic removal of colorectal lesions.
- Optimal strategies for examination of the colonic polyps and the role of artificial intelligence., along with the role of advanced resection techniques such as ESD.
- A state-of-the art update in Bariatric Endoscopy and practical tips for performing endoscopy in patients with altered anatomy, followed by a detailed review of important issues in pancreaticobiliary disorders.
- Practical guidance on achieving high rates of cannulation during ERCP in clinical practice and optimizing outcomes in ERCP with a focus on reduction in post-ERCP pancreatitis rates.
- Management of choledocholithiasis, biliary drainage in malignant obstruction and management of pancreatic fluid collections including walled off pancreatic necrosis.
- Endoscopic examination of patients with Barrett's esophagus and endoscopic eradication therapies in patients with Barrett's related neoplasia.
- Management of most GI emergencies with a pragmatic and algorithmic approach to managing these emergencies in clinical practice.
- Review of current guidelines on the evaluation and management of patients with pancreatic cystic lesions, highlighting the expanding role of EUS.

Participate virtually from your home or office. You'll still receive the world-class educational experience that is the hallmark of ASGE courses, including the ability to participate in real-time Q&A sessions. Course materials will be available prior to the start of the course and upon completion you will receive a recording of the course approximately four weeks after the event.
