Endoscopy Live: GERD and Barrett’s Esophagus features LIVE endoscopy broadcasts from the world’s leading endoscopy centers and clinicians!

Gain practical knowledge with didactic, case-based presentations focusing on the diagnosis and endoscopic treatment of GERD and Barrett’s esophagus. You’ll also get an overview of current and ongoing research as presented at DDW 2021.

LEARNING OBJECTIVES:

1. Describe how lifestyle, medications and surgery all play a role in the therapy of patients with increasingly severe GERD
2. Identify the four key tests to workup GERD: EGD, pH, Manometry and UGI
3. Compare and contrast various endoscopic diagnostics and treatments of Barrett’s Esophagus that are conducted and select correct rationales for each
4. Highlight important trends in diagnosis and treatment methods from selected GERD and BE research abstracts
