EndoSwiss welcomes you to its 5th edition. The international course on diagnostic and therapeutic endoscopy will present the latest developments in gastrointestinal endoscopy. International highly recognized pioneers and outstanding experts in this field will attend the meeting. Four sessions will cover a variety of endoscopic live procedures supplemented by presentations, case discussions and «State of the art» lectures. Interactive teaching is a main focus of the meeting.

A «Masterclass imaging teaching course» will be seperately organized and conducted by the Japanese Gastroenterological Endoscopy Society (JGES) one day before. Focus of this course is the detection, description and classification of premalignant and cancerous GI lesions. At this meeting you may present your own difficult case for discussion with the experts.

The course follows the guidelines and policies of ASGE and ESGE for live demonstrations and is designed for gastroenterologists, surgeons, practising physicians, endoscopy nurses, trainees and students.

Conference language will be English with simultaneous translation into Russian by native speaking russian endoscopists. The meeting will be live-streamed on HYPERLINK «http://www.endo.md» www.endo.md .

We would be very happy if you joined our course. Looking forward to welcoming you in Zurich!

Stefan Seewald, Andreas Müller, Philipp Bertschinger, Bernhard Sauter
