As of March 14, 2017
Dear Colleague:

Welcome to Chicago, IL and the 48th Annual Digestive Disease Week®! The ASGE Governing Board and the Annual Scientific Program Committee are proud to present a comprehensive educational program that offers something for everyone.

As your partner in practice, ASGE presents DDW® 2017 programming with a wide range of learning opportunities developed specifically with the endoscopist in mind. Throughout DDW, ASGE will cover every endoscopic topic in various formats, allowing you to design an experience tailored to your needs. Everything from hands-on activities, didactic lectures, e-learning and video forums are enhanced this year for your educational experience.

Use this Guide as a quick-reference handbook to all of the excellent ASGE opportunities at DDW. Below I’ve outlined just a few sessions and features I think every endoscopist would find valuable:

• **The ASGE Presidential Plenary** (Saturday): Join me for coffee, doughnuts and the latest research. This session will feature brief presentations of the top abstracts submitted to DDW. Each will be followed by a lively talk or debate with eminent experts. The topics will be germane to all endoscopists. (See page 12.)

• **Hands-On Workshops** (Saturday through Tuesday): EMR; suturing and closures; ESD; hemorrhoid therapies and more. These workshops fill up quickly, so be sure to register early. (See pages 14, 15, 19, 21, 25, 27 and 30.)

• **The ASGE Annual Postgraduate Course** (Sunday afternoon and Monday morning): “Best Tips, Worst Mistakes: Lessons From the Masters,” features didactic lectures, video-based case discussions and audience interaction with Q and A. Learn how to approach common problems and avoid pitfalls. A variety of disease states and conditions, as well as novel interventions, will be discussed. (See pages 20 and 23.)

• The popular **ASGE Learning Center** is now a dynamic, interactive educational resource that provides DDW attendees the opportunity to:
  » View videos from ASGE’s complete Endoscopic Learning Library on iPads within the Learning Lounge area, and claim CME right from the iPad.
  » Attend hands-on endoscopic demonstrations hosted by various industry supporters throughout the duration of DDW
  » Enjoy live presentations on hot topics from leading experts within the ASGE Theater area

• **ASGE World Cup of Endoscopy** (Tuesday): This competitive session is as fun as it is educational. Watch presenters from around the globe show outstanding videos in a unique competition judged by an international panel of experts. (See page 33.)

In addition to the events listed above, I hope you will join us on Sunday evening for the prestigious ASGE Crystal Awards at the beautiful Radisson Blu Aqua Hotel. During this special night, we will recognize and honor significant contributions to the field of GI endoscopy. Don’t miss this stellar event! (See page 2.)

Enjoy your time in Chicago, and thank you for supporting ASGE and DDW.

Sincerely,

Kenneth R. McQuaid, MD, FASGE
2016-2017 ASGE President

If endoscopy is your practice, then ASGE is your partner!

Congratulations, ARIA-certified industry representatives!

The ASGE Recognized Industry Associate (ARIA) program is designed to further industry representatives’ GI knowledge and to enhance communication between clinicians and industry representatives. ASGE is proud to recognize ARIA-certified reps for the exceptional effort they’ve made to become better resources for gastroenterologists and the entire GI clinical team.

For more information about ARIA, visit the ASGE Learning Center during DDW or visit www.asge.org/ARIA. Open enrollment ARIA training programs are available throughout the year. ARIA training programs can also be customized to meet the specific training needs of companies. To learn more visit www.asge.org/ARIA.

IMPORTANT SAFETY INFORMATION

SUPREP® Bowel Prep Kit (sodium sulfate, potassium sulfate and magnesium sulfate) Oral Solution is an osmotic laxative indicated for cleansing of the colon as a preparation for colonoscopy in adults. Most common adverse reactions (>2%) are overall discomfort, abdominal distention, abdominal pain, nausea, vomiting and headache.

Use is contraindicated in the following conditions: gastrointestinal (GI) obstruction, bowel perforation, toxic colitis and toxic megacolon, gastric retention, ileus, known allergies to components of the kit. Use caution when prescribing for patients with a history of seizures, arrhythmias, impaired gag reflex, regurgitation or aspiration, severe active ulcerative colitis, impaired renal function or patients taking medications that may affect renal function or electrolytes. Use can cause temporary elevations in uric acid. Uric acid fluctuations in patients with gout may precipitate an acute flare. Administration of osmotic laxative products may produce mucosal aphthous ulcerations, and there have been reports of more serious cases of ischemic colitis requiring hospitalization. Patients with impaired water handling who experience severe vomiting should be closely monitored including measurement of electrolytes. Advise all patients to hydrate adequately before, during, and after use. Each bottle must be diluted with water to a final volume of 16 ounces and ingestion of additional water as recommended is important to patient tolerance.

INDICATIONS AND USAGE: An osmotic laxative indicated for cleansing of the colon as a preparation for colonoscopy in adults. CONTRAINDICATIONS: Use is contraindicated in the following conditions: gastrointestinal (GI) obstruction, bowel perforation, toxic colitis and toxic megacolon, gastric retention, ileus, known allergies to components of the kit. Use caution when prescribing for patients with a history of seizures, arrhythmias, impaired gag reflex, regurgitation or aspiration, severe active ulcerative colitis, impaired renal function or patients taking medications that may affect renal function or electrolytes. Pre-dose and post-colonoscopy ECG’s should be considered in patients at increased risk of serious cardiac arrhythmias. Use can cause temporary elevations in uric acid. Uric acid fluctuations in patients with gout may precipitate an acute flare. Administration of osmotic laxative products may produce mucosal aphthous ulcerations, and there have been reports of more serious cases of ischemic colitis requiring hospitalization. Patients with impaired water handling who experience severe vomiting should be closely monitored including measurement of electrolytes. Advise all patients to hydrate adequately before, during, and after use. Each bottle must be diluted with water to a final volume of 16 ounces and ingestion of additional water as recommended is important to patient tolerance. Pregnancy: Pregnancy Category C. Animal reproduction studies have not been conducted. It is not known whether this product can cause fetal harm or can affect reproductive capacity. Pediatric Use: Safety and effectiveness in pediatric patients has not been established. Geriatric Use: Of the 375 patients who took SUPREP Bowel Prep Kit in clinical trials, 94 (25%) were 65 years of age or older, while 25 (7%) were 75 years of age or older. No overall differences in safety or effectiveness of SUPREP Bowel Prep Kit administered as a split-dose (2-day) regimen were observed between geriatric patients and younger patients. DRUG INTERACTIONS: Oral medication administered within one hour of the start of administration of SUPREP may not be absorbed completely. ADVERSE REACTIONS: Most common adverse reactions (>2%) are overall discomfort, abdominal distention, abdominal pain, nausea, vomiting and headache. Oral Administration: Split-Dose (Two- Day) Regimen: Early in the evening prior to the colonoscopy: Pour the contents of one bottle of SUPREP Bowel Prep Kit into the mixing container provided. Fill the container with water to the 16 ounce fill line, and drink the entire amount. Drink two additional containers filled to the 16 ounce line with water over the next hour. Consume only a light breakfast or have only clear liquids on the day before colonoscopy. Day of Colonoscopy (10 to 12 hours after the evening dose): Pour the contents of the second SUPREP Bowel Prep Kit into the mixing container provided. Fill the container with water to the 16 ounce fill line, and drink the entire amount. Drink two additional containers filled to the 16 ounce line with water over the next hour.
