ASGE CLINICAL COURSE

Bariatric Endoscopy: Accelerate Your Practice

Friday and Saturday, June 21 – 22, 2019

ASGE Institute for Training and Technology
Downers Grove, IL

*Two Ways to Participate!
Attend in person or live-stream from your own device.*

Course Directors

Nitin Kumar, MD
Hospital Sisters Health System, Effingham, IL

Erik B. Wilson, MD
University of Texas Health, Houston, TX

Early Registration Discounts End May 17, 2019 • Register Online at asge.org

WHY YOU SHOULD ATTEND

This course features experts in the area of endoluminal endoscopic weight loss procedures who will provide participants with the latest information on endoscopic bariatric therapies and how to incorporate them into your practice.

As bariatric endoscopy becomes main stream and the number of FDA-approved devices and procedures continues to grow, the time has come to incorporate weight management and endoscopic bariatric therapy into your practice. This course will bring you up to date in the world of bariatric endoscopy, discuss practice integration and development, and provide hands-on experience from experts in the field.

If you are looking to establish and operate an endoscopic weight management practice or simply want to add these capabilities to your existing practice, this is an ideal course for you. Get up-to-speed on everything you need to know AND gain hands-on experience from experts in the field.

Didactic presentations will include:

- A comprehensive review of clinically available primary endoluminal endoscopic weight loss procedures
- An update on the primary weight loss procedures anticipated to become available in the US
- Revisional interventions for added weight loss after surgery
- Management of bariatric surgical adverse outcomes

Hands-on demonstrations will include:

- Gastric balloon placement and retrieval
- Endoscopic sleeve gastroplasty and transoral gastric outlet reduction
- Aspiration therapy placement and management
- Septotomy and pneumatic dilation
- Perforation and fistula closure

WHO SHOULD ATTEND

This course is intended for endoscopists who are integrating bariatric endoscopy into their practice or are affiliated with an established bariatric program.

WHAT YOU WILL LEARN

Upon completion of this educational activity, participants will be able to:

- Recognize appropriate indications and therapeutic options for the endoscopic management of obesity and adverse events of bariatric surgery
- Compare and contrast the current outcomes in endoluminal endoscopic weight loss therapy with each other as well as compared to pharmacotherapy and bariatric surgery
- Demonstrate skills to perform endoluminal primary bariatric procedures and secondary or revisional procedures
- Apply endoscopic techniques for the treatment of obesity and complications of bariatric surgery
