

Endoscopic Bariatric Therapies: Position Your Practice for Success

FRIDAY AND SATURDAY, JULY 20-21, 2018

ASGE Institute for Training and Technology
Downers Grove, Illinois

Early Registration Discounts End June 14, 2018

Over the past decade, the number of bariatric surgical procedures performed in the United States has doubled. As these numbers have increased, so have the number of endoscopic bariatric therapies that either have been approved for clinical use or on the verge of being approved. If you are looking to establish and operate an endoscopic weight management practice or simply want to add these capabilities to your existing practice, this is an ideal course for you. Get up-to-speed on everything you need to know AND gain hands-on experience from experts in the field.

WHY YOU SHOULD PARTICIPATE

This course features experts in the area of endoluminal endoscopic weight loss procedures who will provide participants with the latest information on endoscopic bariatric therapies and how to incorporate them into your practice.

Didactic presentations will include:

- A comprehensive review of clinically available primary endoluminal endoscopic weight loss procedures
- An update on the primary weight loss procedures anticipated to become available in the US
- Revisional interventions for added weight loss after surgery
- Management of bariatric surgical adverse outcomes

Hands-on demonstrations will include:

- Intra-gastric balloon placement and removal
- Endoscopic sleeve gastropasty, placement of percutaneous gastrostomy device
- Gastrojejunal anastomosis revision
- Suture fixation of stents
- Management of sleeve gastrectomy adverse outcomes

What you will learn:

Upon completion of this educational activity, participants will be able to:

- Recognize the necessity of a comprehensive weight management program building as well as how to obtain reimbursement for bariatric endoscopic procedures
- Compare and contrast the current outcomes in endoluminal endoscopic weight loss therapy with each other as well as compared to pharmacotherapy and bariatric surgery
- Demonstrate skills to perform endoluminal primary bariatric procedures and secondary or revisional procedures
- Identify the pathomechanisms behind adverse event outcomes after bariatric surgery and demonstrate the endoscopic skills to treat them

WHO SHOULD ATTEND?

This course is intended for endoscopists who are integrating bariatric endoscopy into their practice or are affiliated with an established bariatric program.

COURSE DIRECTORS

Vivek Kumbhari, MD
