

Learn from the Masters in Esophageal and Advanced Colonoscopy!

2019 ASGE Masterclasses

ASGE IT&T, Downers Grove, IL

Esophageal from GERD to Barrett's

Friday, March 8, 2019

COURSE DIRECTORS

Philip O. Katz, MD
Sachin B. Wani, MD, FASGE

OVERVIEW

This ASGE Masterclass will feature a state-of-the-art didactic discussion of the diagnosis and management of patients with gastroesophageal reflux disease and Barrett's esophagus.

LEARNING OBJECTIVES

- Identify standards of care to perform high quality EGD in GERD and Barrett's esophagus patients
- Compare and contrast the value of high resolution manometry, reflux monitoring (Bravo and impedance), histology and EndoFlip.
- Discuss management techniques of refractory GERD.
- Understand how best to address difficult to treat esophageal strictures.
- Identify standards of care on the utilization of PPI therapy.
- List key quality indicators used in GERD and Barrett's esophagus.
- Determine when it is appropriate to consider endoscopic resection, radiofrequency ablation and/or cryotherapy.

Advanced Colonoscopy Techniques

Saturday, March 9, 2019

COURSE DIRECTOR

Douglas K. Rex, MD, FASGE

OVERVIEW

This ASGE Masterclass will offer participants the unique opportunity to spend a full day engaging in depth with renowned colonoscopy expert Douglas K. Rex, MD, FASGE, as an extensive array of advanced clinical tips are discussed.

LEARNING OBJECTIVES

- Identify how to achieve and exceed the targets for the principle quality indicators including adenoma detection rate and bowel preparation adequacy
- Discuss how to recognize and characterize the full spectrum of pre-cancerous colorectal lesions
- List key observations of cancer in colorectal polyps
- Discuss how to perform chromoendoscopy in IBD patients.
- Discuss how to achieve cecal intubation in patients with angulated sigmoids and redundant colons
- Discuss how to avoid adverse events (complications) and malpractice actions
- Discuss how to perform endoscopic mucosal resection, including specific approaches to large lesions, flat lesions, hard to access lesions, and serrated lesions, as well as specific techniques such as cap-fitted resection, underwater resection, and avulsion.
