

Bariatric Endoscopy Today: From Theory into Practice

FRIDAY AND SATURDAY, JUNE 23-24, 2017

ASGE Institute for Training and Technology
Downers Grove, Illinois

Early Registration Discounts End May 17, 2017

Association for
Bariatric Endoscopy
A DIVISION OF ASGE

Over the past decade, the number of bariatric surgical procedures performed in the United States has doubled.¹ As these numbers have increased, so have the number of endoscopic bariatric therapies that either have been approved for clinical use or are on the verge of being approved. If you are looking to establish and operate an endoscopic weight management practice, or simply want to add these capabilities to your existing practice, this is an ideal course for you. Get up to speed on everything you need to know AND gain hands-on experience from experts in the field.

WHY YOU SHOULD ATTEND

This course features experts in the area of endoluminal endoscopic weight loss procedures who will provide participants with the latest information on endoscopic bariatric therapies and how to incorporate them into your practice.

Didactic presentations will include:

- A comprehensive review of clinically available primary endoluminal endoscopic weight loss procedures
- An update on the primary weight loss procedures anticipated to become available in the US
- Revisional interventions for added weight loss after surgery
- Management of bariatric surgical adverse outcomes

Hands-on demonstrations will include:

- Intra-gastric balloon placement and removal
- Placement of percutaneous gastrostomy device for aspiration therapy
- Anastomosis revision
- Suture fixation of stents
- Management of sleeve gastrectomy adverse outcomes

What you will learn:

Upon completion of this educational activity, participants will be able to:

- Identify the rationale and expectations of endoluminal primary endoscopic weight loss therapy
- Compare and contrast with the current outcomes in endoluminal endoscopic weight loss therapy
- Demonstrate skills to perform endoluminal primary bariatric procedures and secondary or revisional procedures
- List advanced suturing skills as applied within bariatric endoscopy

WHO SHOULD ATTEND?

This course is intended for endoscopists who are integrating bariatric endoscopy into their practice or are affiliated with an established bariatric program.
