MESSAGE
FROM THE PRESIDENT

Dear Colleague:

Welcome to Washington, DC and the 49th Annual Digestive Disease Week®! The ASGE Governing Board and the Annual Scientific Program Committee are proud to present a comprehensive educational program that offers every attendee an educational experience unlike any other.

As your partner in practice, ASGE presents DDW® 2018 programming with a wide range of learning opportunities reflecting the full spectrum of GI health and developed specifically with the endoscopist in mind. Throughout DDW, ASGE will cover every endoscopic topic in various formats, allowing you to design an experience tailored to your needs and interests. Everything from hands-on activities, didactic lectures, e-learning and video forums are enhanced this year for your educational experience.

Use this Guide as a quick-reference handbook to all of the excellent ASGE opportunities at DDW. Below I’ve outlined just a few sessions and features I think every ASGE member would find valuable:

- **The ASGE Presidential Plenary** (Saturday): Join me for coffee, doughnuts and the latest research. This session will feature brief presentations of the top abstracts submitted to DDW. Each will be followed by a lively talk or debate featuring eminent experts. The topics will be germane to all endoscopists. *(see page 15)*

- **Hands-on Workshops** (Saturday through Tuesday): ESD; suturing and closures; EMR; bariatric therapies and more. These workshops fill up quickly, so be sure to register early. *(see page 3)*

- **The ASGE Annual Postgraduate Course** (Sunday afternoon and Monday morning): “Frontiers in Gastrointestinal Endoscopy: A Crossroad Between Innovation and Practice” features didactic lectures, video-based case discussions and audience interaction with Q and A. Learn well-established best practices along with new and innovative approaches to everyday endoscopic challenges. *(see page 3)*

- The popular **ASGE Learning Center** is now a dynamic, interactive educational resource that provides DDW attendees the opportunity to:
  - View videos from ASGE’s complete Endoscopic Learning Library on iPads within the Learning Lounge area.
  - Attend hands-on endoscopic demonstrations hosted by various industry supporters throughout the duration of DDW.
  - Enjoy live presentations on hot topics from leading experts within the ASGE Theater area.
  - Learn more about the new ASGE online learning platform, GI Leap.

- **ASGE World Cup of Endoscopy** (Tuesday): This competitive session is as fun as it is educational. Watch presenters from around the globe show outstanding videos in a unique competition judged by an international panel of experts. *(see page 39)*

In addition to the events listed above, I hope you will join us on Sunday evening for the prestigious ASGE Crystal Awards at the beautiful Ronald Reagan Building and International Trade Center. During this special night, we will recognize and honor significant contributions to the field of GI endoscopy. Don’t miss this awesome ‘80s-themed event! *(see page 2)*

Enjoy your time in Washington, and thank you for supporting ASGE and DDW.

Sincerely,

Karen L. Woods, MD, FASGE

NEW ASGE “GI Leap” – Learn, Explore, Advance Practice!

Based on member wants and needs identified by an ASGE physician task force, and with funding from the Beyond Our Walls campaign, ASGE has launched the next generation of a learning management system and related e-learning resources. The results will enhance ASGE’s digital footprint going forward. Important functions include the integration of mobile devices, online/offline capabilities, ease of navigation and a platform that is truly individualized, where it learns as the participant learns, making recommendations with their evolving educational journey. Come by and “leap” into the experience for yourself.

Webpage: learn.asge.org

Now Available – GESAP IX!

ASGE is excited to announce the latest edition of the Gastro-intestinal Endoscopy Self-Assessment Program, GESAP IX. Powered by ASGE’s GI Leap platform, GESAP IX has upgraded features that bring you better performance, educational content, functionality, simplicity, and control. Highlights include:

• New Liver module
• Two modes of learning for self assessment: Learning (CME credit only) or Exam (CME and MOC credit combined)
• Online-offline capabilities

Touch Surgery is an app-based interactive simulator, providing a realistic and detailed guide to every step of a procedure. Published research demonstrates that users are able to more quickly learn, test their knowledge, and improve their comprehension of procedures. We believe this form of simulation platform can enable endoscopists to learn and practice a variety of gastroenterological approaches. Let us know what you think!

ASGE Theater

Attend and listen to ASGE clinical experts in the field of gastroenterology by participating in one or more of the hot topics and challenges that include GI disease management and therapeutic or diagnostic procedures. See schedule on the next page.

Technology Demonstration and Hands-On Experiences

Participants of ASGE’s Learning Center will have the opportunity to participate in small group presentations with hands-on demonstrations of GI tools, up-to-date equipment and technology. No registration is required to participate, but planning your schedule accordingly when these sessions are occurring is suggested. See the schedule on the next page.

important safety information

suprep® bowel prep kit (sodium sulfate, potassium sulfate and magnesium sulfate) oral solution is an osmotic laxative indicated for cleansing of the colon as a preparation for colonoscopy in adults. Most common adverse reactions (>2%) are overall discomfort, abdominal distention, abdominal pain, nausea, vomiting and headache.

use is contraindicated in the following conditions: gastrointestinal (gi) obstruction, bowel perforation, toxic colitis and toxic megacolon, gastric retention, ileus, known allergies to components of the kit. Use caution when prescribing for patients with a history of seizures, arrhythmias, impaired gag reflex, regurgitation or aspiration, severe active ulcerative colitis, impaired renal function or patients taking medications that may affect renal function or electrolytes. Use can cause temporary elevations in uric acid. Uric acid fluctuations in patients with gout may precipitate an acute flare. Administration of osmotic laxative products may produce mucosal aphthous ulcerations, and there have been reports of more serious cases of ischemic colitis requiring hospitalization. Patients with impaired water handling who experience severe vomiting should be closely monitored including measurement of electrolytes. Advise all patients to hydrate adequately before, during, and after use. Each bottle must be diluted with water to a final volume of 16 ounces and ingestion of additional water as recommended is important to patient tolerance.
